

First Mobile Game in Leo Messi-GOAL! Series

Artificial Life announced the release of Leo Messi-Goal!, the first installment in a series of mobile games based on Leo Messi, the 21-year-old Argentine and now Beijing Olympic 2008 Gold Medalist.

Developed using authentic motion capture data, Artificial Life's production team held an exclusive photo session with Messi to record his signature moves for their inclusion in the game.

In the game, players control the avatar of Leo Messi and his team to go for league championship.

Traditional soccer moves, such as fouling players, corner, free and penalty vkicks, are included for realistic soccer simulation. As the official game for Leo Messi, special tricks are featuredexclusively on him and presented with high quality 2D and 3D graphics based on motion-capture technology.
