Malian Expression

Transient and Stable Cell Line Expression. High Purity and Soluble

The marketing slogan used for the new BMW Z4 is being transformed into an iPhone application. Artificial Life, Inc. has signed a global exclusive license agreement with BMW to develop the “BMW Z4 An Expression of Joy” application for iPhone and iTouch.

Artificial Life’s production team will produce 3D models and animations of BMW’s new Z4 series and the iPhone’s motion sensors and touch screen will be used in a multi-control game.

Think about virtually driving your new Z4, steering and braking by swiping or multi-touching. The game will also include the dynamic sounds effects recorded from the real BMW models.
